CODE SECTION: Administrative Policy and Procedure

TOPIC: Written policy and procedures prior to MP & E Inspections

PURPOSE/REASON: Framers are removing protective nail plates and changing clearances at electrical wiring, plumbing piping and mechanical vents when straightening walls. Bad/Damaged studs are getting changed out with wires or piping being damaged and no protection plates being added or reinstalled. Lathers are shooting staples into electrical boxes, wiring and plumbing piping.

This has been standard operating procedure for a number of years.

INTERPRETATION: All framing "pick-up" including shim and shave to be completed and the lath installed and **approved** nailed or stapled prior to electrical, plumbing, and mechanical inspections.

Approved: Chris Knight, Building Official
